

Fountain Project • Ceramics 2 & 3 • Mrs. Estoch

Name: _____ Period _____

Research fountains. Find the fountain designs that you find interesting. Fountains must have a part where the water flows out and a base to hold water (at least two parts or more)

Draw three different/interesting fountain shapes you have found during your research

--	--	--

Draw three more fountain ideas showing how would you utilize glazes. Use COLOR.

--	--	--

Draw three ideas for the patterns of your piece (close up of the details)

--	--	--

Look at your ideas...Would you combine any of these elements? Which ones?

Draw your final ideas for your final fountain idea and use color. **Show detail and draw neatly.** This idea will be used for your project. Show where the fountain, cord and tubing will be placed as well as the direction/flow of water.

Describe your process that you will use to build your fountain (step by step)...
